# First step to use SweetBiteAPP

After you download from your app store, you must then register by filling in form and clicking register.

When you enter the first time your Dashboard will be empty, so you will need to enter/input at least one item in each of the areas (Types, Places, Suppliers and Materials)
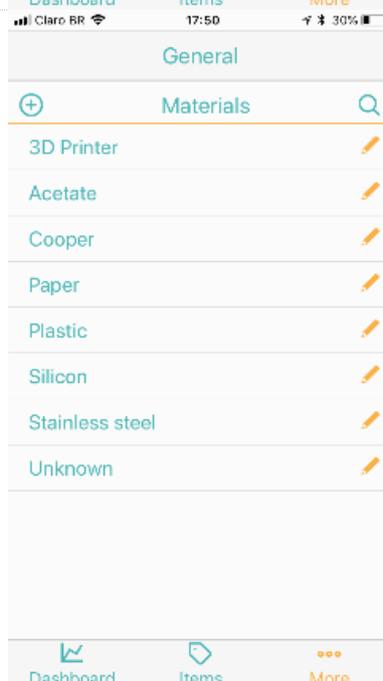

You can input types, places, suppliers and Materials, at menu More... or just clicking at each information at dashboard
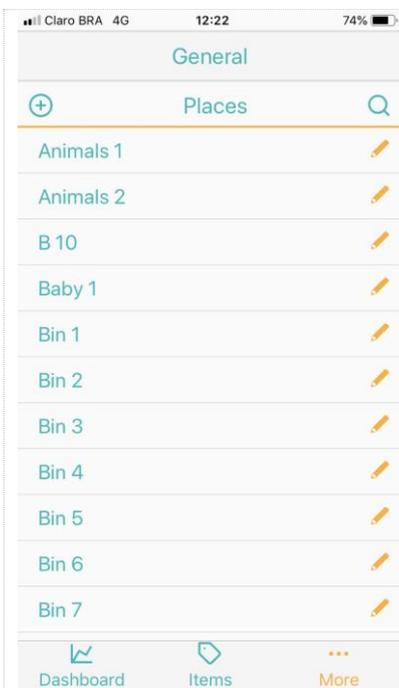

Here are examples of "Types" of categories that you can use. Feel free to use the ones that you want.

Here are examples of "Suppliers" that you can use, feel free to use the ones you want.

Here are examples of "Materials" that you can use, feel free to use the ones you want.

Here are examples of "Places" that you can use, again use the ones you would like. You can also organize by Bin 1, Bin 2, Bin 3, etc.

These four bases have basic the same "data": Name and Information. You must input all data to register them.

At information field you can put the contact information from your supplier, or some information from the material, and this is the same form Type and Places.

Now you are ready to "Create Item". To insert a photo just click on the SweetBite logo and choose from your library or take a picture.

You must input all information and then save.

The last information at the item is the TAG's, the last but not the least.

The information you input at this field you can use to find this tool, remember that Places, Suppliers, Types and Materials is already indexed, by indexed means that you can find any information by this fields.

To input more then one TAG you need use ";"

Now is just input all your item you want to organize.

Will take a while at this begin but you will feel the difference before you finish this organization.

At the item menu you can search for your items by any of information you input like suppliers, or place.

Remember the TAG's also is a way to locate what you want.
